

John Moeder

Software Engineer

Email: moedercarj@yahoo.com

About

John is currently a Senior Software Engineer at LexisNexis Risk Solutions. In this role he works on a full stack web team supporting a large software product. He aids with DevOps, product development, ELK/Kibana log management, alerting, and other special projects. He enjoys honing his full stack knowledge and often spends his free time learning new tools and techniques for both the front & backend. He always like a challenge, does not mind wearing multiple hats and considers himself a “John of many trades”.

Experience

LexisNexis	September 2022 - Present
------------	--------------------------

- Full Stack development with React (ReactJS), Vanilla JavaScript, Perl, MySQL, XML, and HTML template libraries, Bootstrap library, Material UI (MUI).
